

WILDLIFE MONITORING

WorkSafeBC has mandated that workers in remote areas have training in case of potential wildlife encounters. CNC Continuing Education has partnered with Backcountry Wildlife Monitoring to provide this top quality Wildlife Monitoring course.

Whether you are a professional who will be using your skills in remote areas or you want to be a designated Wildlife Monitor, this course will provide you with the knowledge and skills to keep you and your team safe.

In this two-day course you will learn:

- How to conduct safety orientations
- Characteristics and classifications of dangerous wildlife
- How to complete hazard analysis
- Emergency planning
- Escalation of procedures when confronted with a dangerous wildlife encounter
- Applicable regulation and legislation

Note: Upon completion of this course, participants may enroll in an optional one-day Firearms Range Training Course on April 23, 2015. This optional course will be an additional cost and registration information will be provided to you via email once you have signed up for Wildlife Monitoring.

Recommended

A valid Canadian Firearms License and a valid Driver's License

Fees

\$695 Plus Tech Fee
